

A 4D Cam picture is worth more than a thousand words

With 4D Cam on your Motion Pen Tablet, there is no reason for mis-information to impact your profitability again!

4D Cam images captured on Motion Pen Tablets are uniquely stamped with date, time and GPS position to provide you with a clear picture of what was actually observed on site.

- Construction
- Maintenance
- Field surveys
- Condition Audits
- NBN Design optimization
- Evidence & investigations
- Asset Data Capture
- Risk identification

Now mobile workers can convey complex observations, identify risks and capture current status. **4D Cam** images can save time, money and lives.

You can mark up or redline drawings, diagrams or floor plans using 4D Cam... and email them for decision support!

4D Cam photos are easy to capture, mark up and share to prevent the costs of misquoting, wrong parts, rework, revisits to increase your productivity and profitability.

All Images are saved with Date, Time and Position*

Your Mobile workforce can save \$1,000's by preventing site revisits, wrong parts or equipment

"Whether you work in service delivery , construction, maintenance, data capture, conduct inspections or field audits.....

Being able to visually interpret images taken with 4D Cam on Motion Pen Tablets, which are hand marked, uniquely labelled and EXIF tagged with GPS coordinates, enables distributed groups to share knowledge accurately, which increases the productivity and confidence of your mobile workforce."

- Peter Terrett, Managing Director RapidMap

Capture and Collaborate

4D Cam enables field staff to gain rapid support from experienced colleagues by emailing marked up images from the site.

4D Cam images are used for:

- Conducting Asset condition surveys
- Capturing images of animal or plant disease
- Identifying risks and potential hazards
- Collecting before and after photos (eg Graffiti removal)
- Training new technicians
- Recording evidence of non compliance
- Marking up floor plans and drawings on site
- Confirming utilities infrastructure
- Highlighting injury on body diagrams
- Sharing sketch plans from site visit
- Incident reports
